EFFORTLESS

CRYPTO INVESTMENT

Your kick start guide

To become your own
wealth manager

Words from Founder

Go from zero to crypto in minutes. Sign up in an instant and access several investment services anywhere you go, whenever you like.

suncrypthub founded in 2017 as cooperative firm partnering with various big companies and registered as a private company in 2021. suncrypthub offers an easy to use platform that enables you to securely invest in artificial intelligence, electric cars, legal cannabis, biotech, cyber tech, oil and gas, forex and crypto.

Finally a way to invest in individual crypto currencies, artificial intelligence, electric cars, legal cannabis, biotech cyber security, stocks and commodities that's easy secure and trusted.

Diversification works in every investment category so it should come as no surprise that it works in crypto too. For most investors its wise to keep your investment portfolio diversified and rebalanced regularly - and if you can do that with minimal effort and cost, all the better.

With our experience, you'll get a diversified investment portfolio through one investment that is automatically updated every month so you can keep up with the fast changing market.

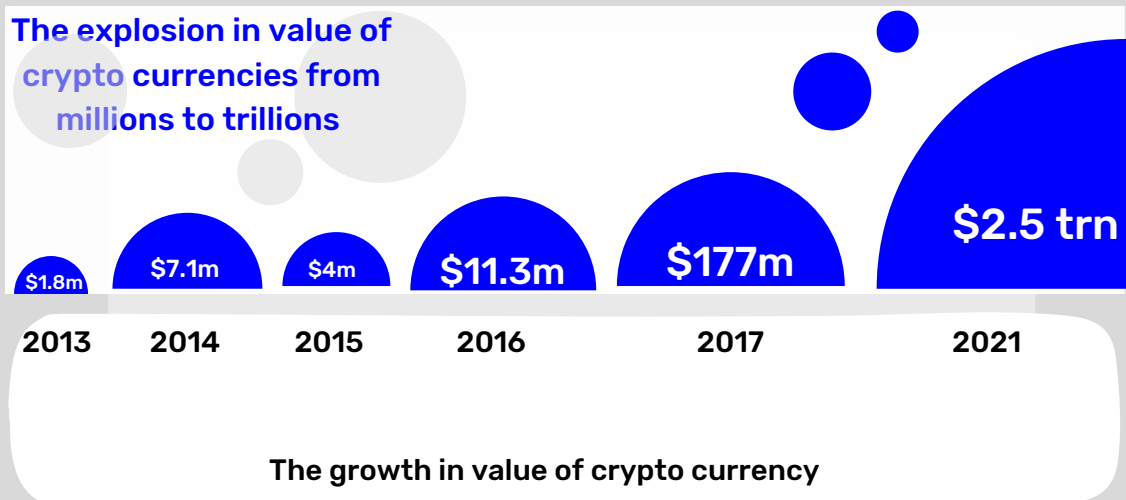

SUNCRYPTHUB

Why invest in crypto currencies?

Crypto currencies are the best performing asset class of the past 10 years, while this trillion dollar market has expanded rapidly, it only still makes up a tiny fraction of the total markets that stands to disrupt . What if a single crypto currency *becomes the currency of choice for a single unstable nation plagued by hyperinflation ? What if it becomes even modestly successful in mobile payments? These are some of the many possibilities.*

Additionally , investing in crypto currencies can diversify your portfolio outside of stocks, commodities and bonds. With that said, every investment holds risk, and with higher risk comes the potential for higher rewards. The explosion in value of crypto currencies : from millions to trillions

Here are a couple of reasons why it's an ideal time to invest in crypto

It's still early days

Many people think that they've missed out on crypto's growth - however, crypto is still a small and emerging type of asset with big disruption and potential, meaning they could still be a lot of growth ahead

The crypto network is growing every day

Everyday more users are joining the crypto ecosystem, more companies are emerging and growing within the crypto space and the worlds becoming more digital

Why invest with suncrypthub?

If you thought investing had to involve confusing jargon, terrible customer service, overwhelming options or hidden fees think again! Because with suncrypthub you can go from cash to crypto instantly. We exist to make investing effortless and secure.

We don't think investors should only be for the fancy finance people. That's why our mission is to empower you to become your own wealth manager with our online platform you can easily invest in individual crypto currencies, artificial intelligence, electric cars, legal cannabis, biotech cybersecurity, stocks and commodities

Oh and let's not forget to mention that without behavioral-based rewards program you can earn points, unlock lower fees and be rewarded in bitcoin. It's just another way we're making investing that much more exciting and engaging.

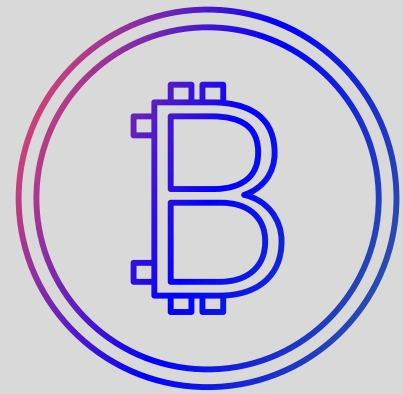

- The easiest and smartest way to learn in crypto through investment
- Earn an interest-like return on your investment
- State-of-the-art security for your peace of mind
- Customer support that any bank would dream of
- Transparent pricing with no hidden charges or fees

- Biotech
- Stocks and
- Commodities investments

CRYPTO CURRENCY AND FOREX INVESTMENT

The aim of this product is to mimic the performance of the broader cryptocurrency market and deliver on one promise:

To make sure that you own the 10 largest and top-performing success stories in the crypto space, whatever they may be. As a new (or seasoned) investor, it can be tricky trying to guess which cryptocurrencies will become the next success stories. You also don't want to invest all your money into a single cryptocurrency as this is a risky strategy.

Our solution? Bundle up!

For you personally, it's probably better you can pick better visual cryptocurrencies to invest in but even the professional struggle to choose cryptocurrency that consistently outperform the overall market.

So it's perhaps no surprise that the simple and low-cost solution of bundles—which can track the crypto market as a whole—have become such a hit with investors. By buying a slice of Bitcoin, Ethereum and many more all-in-one, you will reap the rewards of their success without getting dragged down too much when any one declines in value.

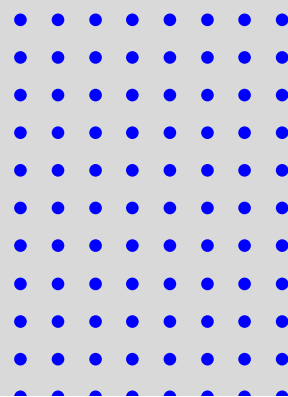

Benefits of suncrypthub crypto and forex investment!

If you're not sure what to invest in, a suncrypthub bundle is a great option. We tend to make sure your funds are invested correctly to lower risk of overexposure to any crypto inflation, less effort and trading fees for you.

Constantly stay up-to-date with the latest crypto market development, holding account across multiple exchanges securing your crypto keys and periodically re-weighting your crypto portfolio to manage your crypto risk exposure is a time-consuming and complicated process. Luckily with suncrypthub crypto investment, we do all the work for you and give you good percentage Returns.

SUNCRYPHUB

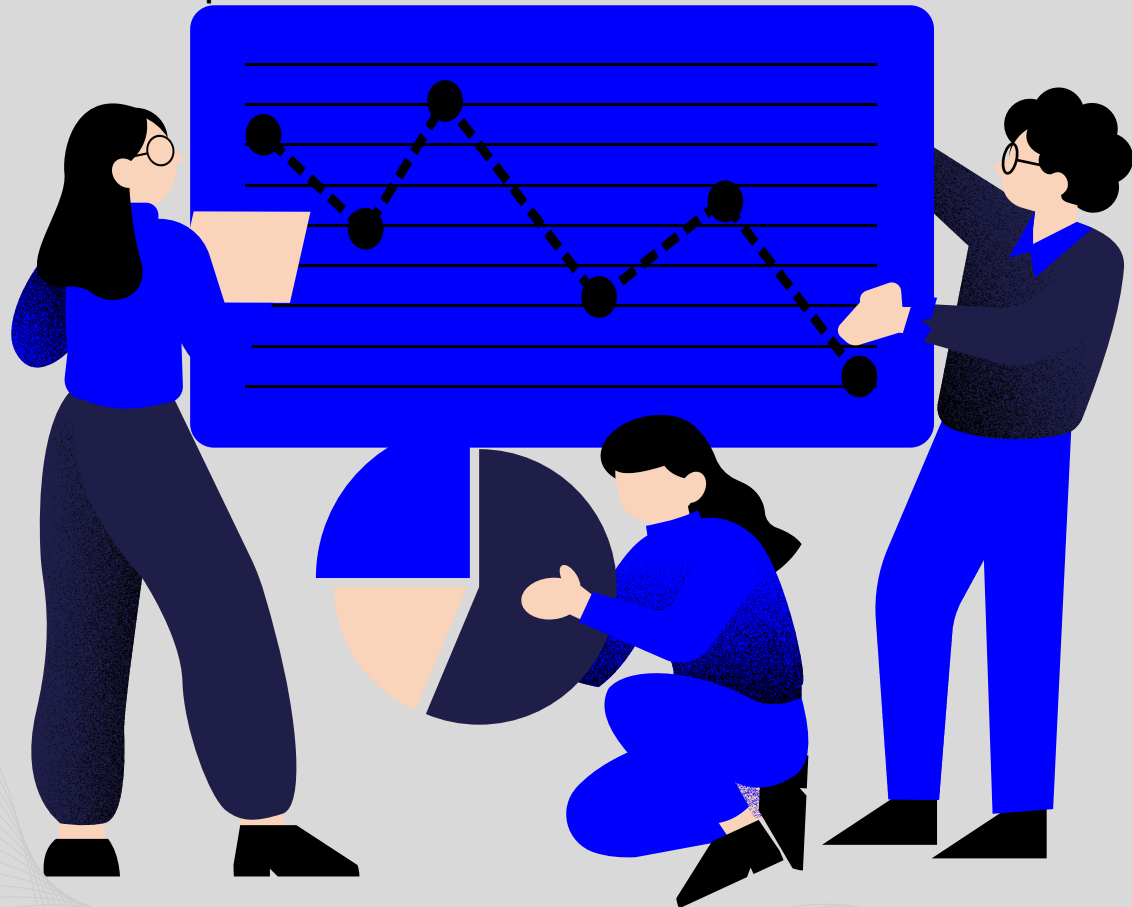

REAL ESTATE INVESTMENT

Welcome to the future of real estate investing.

With suncrypthub you can invest in a low-cost diversified portfolio of institutional-quality real estate. We combine state-of-the-art technology with in-house expertise to reduce fees and maximize your long-term return potential.

Real estate has traditionally been one of the most sought-after asset classes for professional investors. When you invest through suncrypthub, you are investing through our platform into the private market. This is of course as opposed to the public market (think publicly traded stocks, ETFs, REITs, etc). Much like a technology startup that raises venture capital and then grows for several years a private company before "going public" through an IPO, real estate assets (such as apartment buildings, single family rentals, or industrial warehouses) go through a similar life cycle whereby they are owned and matured in the private market before effectively "IPOing" as well, most often in the form of a sale to an existing public REIT.

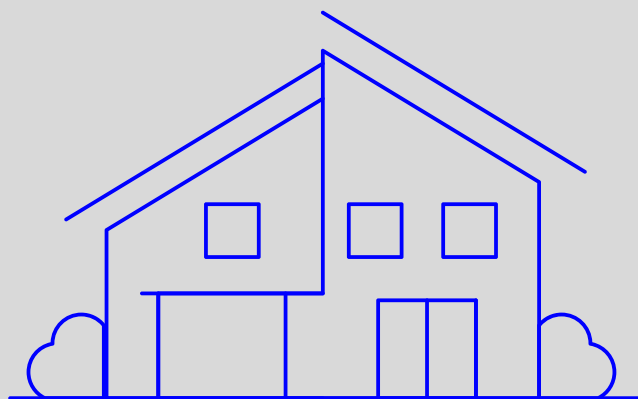

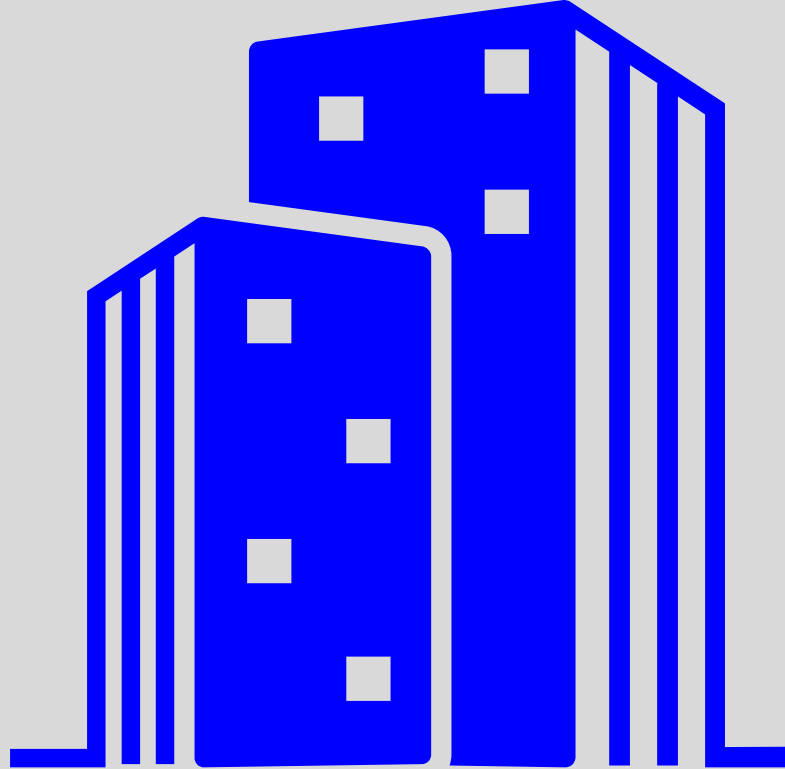

And much like trying to invest in Facebook, Google or Amazon before they went public, access to private market (ie "early stage") real estate investment is restricted, only available to those who go through a series of institutional channels controlled by intermediaries and Gatekeepers, all of whom charge hefty tolls in the form of performance fees, sales commissions, and other transaction costs.

In fact, unless you happen to be old enough to have a pension most investors simply do not have any feasible way to access the private market and as a result are limited to investing exclusively in publicly traded stocks. This matters because when you invest in a company(or a real estate asset) once it is in the public market you are far more often than not paying a higher price, ie a premium, is those who have the ability to buy into the asset while it is still private.

This idea of both disrupting and consolidating the "private equity value chain" lies at the very heart of suncrypthub and it's something that we plan to discuss in Greater length in the near future, but for now to keep things simple, it's sufficient to think of investing through suncrypthub like buying something wholesale, whereby regardless of the Investment strategy itself our technology is allowing you to get access to the assets at a lower effective cost merely as result of being able to cut out unnecessary middlemen.

suncrypthub REAL ESTATE INVESTMENT

suncrypthub allows you diversify outside the public market with private real estate, allowing you to reduce risk and improve stability.

Unlike most private real estate investments, our low minimums gives you the flexibility to invest the right amount at the right time, to meet your goals.

Our assets drive your returns. We pair our extensive network and expertise with the Collective buying power of our investor community to acquire high-quality assets ranging from debt-to-equity, commercial to residential and more.

We have reduced our cost and your fees to ensure you keep more of what you earn. We did this by designing new software that makes dozens of expensive but required processes much cheaper at scale.

After you place your initial investment we'll keep working to find and add new assets to your portfolio over time-with no additional investment required on your end. This means your already diversified portfolio can become stronger year after year.

SUNCRYPHUB

OIL AND GAS INVESTMENT

The oil and gas sector is an attractive sector for both day traders and long-term investors. The sector is an active and liquid market that can also serve as a portfolio diversifier and inflation hedge. Oil and gas stocks, however, tend to be more volatile than the broader market as they are sensitive to changes in the supply and demand of the underlying commodities.

The need for Oil and Gas production has been steadily increasing to the growing consumer demand in the US, India, China and other countries of the world. suncrypthub Energy Group plays an essential role in bringing the energy sector and qualified and approved investors together and takes pride about his role in helping the country achieve energy independence.

SUNCRYPTHUB
OIL AND GAS
INVESTMENT

If you choose to invest in suncrypthub oil and gas you have the potential for a lifetime of Returns on investments and tax deductions. Because the Federal Government allows oil investors to deduct taxes during the oil well development process, now is the time to invest in an oil and gas well company.

SUNCRYPTHUB
